

March 18, 2020

**Dear Residents,**

Guidelines for you on Falcons Landing's COVID-19 precautions and recommendations:

**New Resident Screening at Front Gate:**

Effective immediately, as an extra precaution, we are closing the resident section at the Front Gate and all residents will be screened at the visitor gate prior to re-enter Falcons Landing.

Should a resident screen positive, they will be directed to go directly to their residence and wait for a second screening from Joan Sweeny, Wellness Coordinator, or a Nursing Supervisor.

Please know that maintaining your health, wellness and safety is our top priority.

**Friendly reminder - Prevention**

Residents are strongly encouraged to stay home as much as possible to further reduce your risk of being exposed to COVID-19. Please do not make any trips to shopping centers, restaurants, entertainment venues, churches and routine medical appointments.

If you must leave the campus, adhere to the CDC "social distancing" guidance by maintaining at least a 6-ft distance between you and anyone else when you are in public - on our campus or off campus.

Continue to wash your hands often with soap and water for at least 20 seconds. Make sure you reach all surfaces of your hands.

Avoid touching your eyes, nose and mouth with unwashed hands.

**If You Feel Ill**

If you should develop any symptoms of a respiratory illness and/or a fever, telephone the Wellness Center for guidance (703-404-5224) or contact your personal physician. Do not go to the Wellness Center or your doctor's office without calling first. For assistance after hours, please contact the Front Desk by telephone. (703-404-5100). Do not go to the Front Desk for assistance. For an emergency, you may call 911 directly or press your SARA pendant and the Front Desk will assist you.

We continue to closely monitor the spread of the COVID-19 virus and we will adjust our plans and services based on the most current information and recommendations. I will send further updates when there are changes. Thank you all for your cooperation and patience as we endure this unprecedented public health emergency.

Take care and be safe,

Barb
